Adding new employees in LandMagic Overview

Employees are used in Field Time, Crop Care and Mobile Magic. They are also needed for general use and entry into the software.

NOTE- If you add new employee/worker using MobileMagic, they will also need to be added to LandMagic. This will allow the names to show up on the imported WorkSheets.

How to add a new employee in LandMagic

1. Under the Land Master Icon, select **Contacts**.
2. **The Contacts List page will display**

3. Click the **Plus** icon
